SEUNG WHAN CHUNG

Computational Scientist ⋄ Center for Applied Scientific Computing ⋄ Lawrence Livermore National Laboratory
chung28@llnl.gov ⋄ chung-research.com ⋄ linkedin

EDUCATION

University of Illinois at Urbana-Champaign *January 2017 - August 2021*
Ph. D in Theoretical and Applied Mechanics GPA: 4.0/4.0
University of Illinois at Urbana-Champaign *August 2014 - December 2016*
M. S in Theoretical and Applied Mechanics GPA: 3.88/4.0
Seoul National University *March 2008 - February 2014*
B. S. in Mechanical and Aerospace Engineering (Summa cum laude) GPA: 3.96/4.3

RESEARCH

○ **Lawrence Livermore National Laboratory** April 2024 - Present
Computational Scientist Livermore, CA

○ **Lawrence Livermore National Laboratory** January 2023 - March 2024
Postdoctoral Staff Member Livermore, CA

· Developed a scalable reduced order model with discontinuous Galerkin domain decomposition
· Orchestrated the development of `pylibROM`, python interface for the library of reduced order modeling
· Advised and mentored three student interns (Ping-Hsuan Tsai, Seung-Won Suh, Axel Larsson)

○ **University of Texas at Austin** September 2021 - December 2022
Postdoctoral Fellow (with Prof. R. Moser, Prof. L. Raja, Dr. T. Oliver) Austin, TX

· Uncertainty quantification of electron-argon collision cross sections via Bayesian inference
· Physics-based reduced-modeling of inductively-coupled argon plasma torch
· Developed a discontinuous-Galerkin HPC solver for large-scale non-equilibrium plasma simulations

○ **University of Illinois at Urbana-Champaign** January 2015 - August 2021
Graduate Researcher (with Prof. Jonathan Freund) Urbana, IL

· Developed multi-point penalty-based optimization framework for chaotic turbulent flows.
· Implemented and validated turbulence statistics and sound radiation of a compressible Mach-1.3 jet.

○ **Sandia National Laboratories** January 2017 - May 2017
Student Intern (with Dr. Stephen D. Bond, Dr. Eric C. Cyr) Albuquerque, NM

· Developed a novel regular gradient computing method for chaotic particle plasma simulations.
· Demonstrated gradient computation for Debye shielding response and sheath edge formation.

SKILLS

Computer Languages	Python, C++, MATLAB, Fortran, pybind11
Parallel Programming	MPI
Simulation Libraries	`MFEM`, `libROM`, `Gmsh`
Scripting	Python, Bash, Flux
Version Control	Git, Docker
Documentation	LaTeX, Vi/Vim, Mendeley
Visualization and I/O	PLOT3D, HDF5, Paraview
Presentation	Beamer, Keynote, Adobe Illustrator/Premiere

PUBLICATIONS

INVITED TALKS

S. W. Chung, *FEM@LLNL Seminar*, Lawrence Livermore National Laboratory, (2024).

J. B. Freund & **S. W. Chung**, Lawrence Livermore National Laboratory, (2021).

S. W. Chung, *Fluid Mechanics Seminar*, University of Illinois at Urbana-Champaign, (2020).

S. W. Chung, Sandia National Laboratories, (2017).

JOURNAL REFEREE

Journal of Fluid Mechanics (2022-present)
Physics of Fluids (2025-present)

RESEARCH TOOLS DEVELOPED

- **`scaleupROM`: Scalable Physics-guided Reduced Order Model**
  https://github.com/LLNL/scaleupROM
  - A data-driven discontinuous Galerkin FEM for general PDE systems based upon `MFEM` and `libROM`
  - Developed and demonstrated the framework for various physics

- **`pylibROM`: python interface for libROM**
  https://github.com/LLNL/pylibROM
  - Implemented efficient python interface for `libROM` classes
  - Demonstrated examples of DMD and projection-based ROM for various physics systems

- **`libROM`: Library for Reduced Order Models**
  https://www.librom.net/
  - Implemented and maintained Docker container and CI workflow

- **`TPS`: Torch Plasma Simulator**
  with M. Bolinches, T. Oliver, K. Schulz, R. Moser https://github.com/pecos/tps
  - A discontinuous-Galerkin multi-physics application to support a plasma torch prediction, implmented upon a gpu-enabled finite-element library (`MFEM`)
  - Formulated and implmented a two-temperature non-equilibrium reacting flow solver

- **`magudi`: Dual-consistent, Discrete-exact Adjoint solver for Compressible Flows**
  with R. Vishnampet, J. B. Freund https://github.com/dreamer2368/magudi
  - A Fortran-based compressible flow solver, equipped with discrete-exact adjoint-based gradient.
  - Incorporated a Python-based framework for multi-point penalty-based optimization capability.

- **`torch1d`: one-dimensional reduced-model for inductively-coupled plasma torch**
  with T. Oliver, R. Moser https://github.com/pecos/torch1d
  - A Python-based finite-difference solver for a one-dimensional reduced torch model
  - Supports low-Mach limit formulation for two-temperature non-equilibrium plasma

- **`adjoint playground`: Adjoint, penalty-based optimization for chaotic flow controls**
  with J. B. Freund *Available upon request*
  - A MATLAB-based penalty-based optimization framework for various chaotic dynamical systems.
  - Provides a discrete-exact adjoint gradient for semi-implicit Runge-Kutta 4th-order time integrator.

- **`PASS`: Particle Adjoint Sensitivity Sandbox**
  with J. B. Freund https://github.com/dreamer2368/PASS
  - A Fortran-based 1D Particle-in-Cell code for plasma kinetics, with adjoint gradient capability

AWARDS/FELLOWSHIPS

Jeong-Song Fellowship 2014 - 2016
Jeong-Song Cultural Foundation, Korea $110,000

Honor Graduation Award 2014
Seoul National University Ranked 5 of 139 (summa cum laude)

Presidential Science Fellowship 2008 - 2014
M. B. Lee, the President of Republic of Korea $40,000

TEACHING

◦ **TAM 210/211: Statics** Spring 2020
Teaching Assistant University of Illinois at Urbana-Champaign

· Ranked as Excellent in the list of Spring 2020 semester.
· Conducted discussion sessions (1 time/wk) for 27 students.
· Prepared in-depth solution procedures.
· Provided extended office hours: 6 hrs/wk

GRADUATE COURSES

Fluid Mechanics	**Computational Methods**	**Applied Mechanics**
Inviscid Flow	Computational Mechanics	Control System Theory & Design
Viscous Flow	Uncertainty Quantification	Solid Mechanics I
Instability and Transition	Asymptotic Method	Combustion Fundamentals
Turbulence	Mathematical Methods II	Non-Newtonian Fluid Mechanics & Rheology
