## EDUCATION

<b>University of Illinois at Urbana-Champaign</b>	<i>January 2017 - August 2021</i>
Ph. D in Theoretical and Applied Mechanics	GPA: 4.0/4.0
<b>University of Illinois at Urbana-Champaign</b>	<i>August 2014 - December 2016</i>
M. S in Theoretical and Applied Mechanics	GPA: 3.88/4.0
<b>Seoul National University</b>	<i>March 2008 - February 2014</i>
B. S. in Mechanical and Aerospace Engineering (Summa cum laude)	GPA: 3.96/4.3

## RESEARCH

- **Lawrence Livermore National Laboratory** *April 2024 - Present*  
*Computational Scientist* Livermore, CA
- **Lawrence Livermore National Laboratory** *January 2023 - March 2024*  
*Postdoctoral Staff Member* Livermore, CA
  - Developed a scalable reduced order model with discontinuous Galerkin domain decomposition
  - Orchestrated the development of `pylibROM`, python interface for the library of reduced order modeling
  - Advised and mentored three student interns (Ping-Hsuan Tsai, Seung-Won Suh, Axel Larsson)
- **University of Texas at Austin** *September 2021 - December 2022*  
*Postdoctoral Fellow* (with Prof. R. Moser, Prof. L. Raja, Dr. T. Oliver) Austin, TX
  - Uncertainty quantification of electron-argon collision cross sections via Bayesian inference
  - Physics-based reduced-modeling of inductively-coupled argon plasma torch
  - Developed a discontinuous-Galerkin HPC solver for large-scale non-equilibrium plasma simulations
- **University of Illinois at Urbana-Champaign** *January 2015 - August 2021*  
*Graduate Researcher* (with Prof. Jonathan Freund) Urbana, IL
  - Developed multi-point penalty-based optimization framework for chaotic turbulent flows.
  - Implemented and validated turbulence statistics and sound radiation of a compressible Mach-1.3 jet.
- **Sandia National Laboratories** *January 2017 - May 2017*  
*Student Intern* (with Dr. Stephen D. Bond, Dr. Eric C. Cyr) Albuquerque, NM
  - Developed a novel regular gradient computing method for chaotic particle plasma simulations.
  - Demonstrated gradient computation for Debye shielding response and sheath edge formation.

## SKILLS

<b>Computer Languages</b>	Python, C++, MATLAB, Fortran, pybind11
<b>Parallel Programming</b>	MPI
<b>Simulation Libraries</b>	<a href="#">MFEM</a> , <a href="#">libROM</a> , <a href="#">Gmsh</a>
<b>Scripting</b>	Python, Bash, Flux
<b>Version Control</b>	Git, Docker
<b>Documentation</b>	L <sup>A</sup> T <sub>E</sub> X, Vi/Vim, Mendeley
<b>Visualization and I/O</b>	PLOT3D, HDF5, Paraview
<b>Presentation</b>	Beamer, Keynote, Adobe Illustrator/Premiere

**S. W. Chung**, R. Vishnampet, D. Bodony, & J. B. Freund, “Adjoint-based sensitivity of jet noise to near-nozzle forcing,” *Bulletin of the American Physical Society*, **62** (2017).

## INVITED TALKS

---

**S. W. Chung**, “Overview of data-driven finite element method and its pathway toward foundation model in computational science,” *Interdisciplinary Scientific Computing Laboratory Seminar*, Pennsylvania State University, (2025).

**S. W. Chung**, “Data-driven discontinuous Galerkin FEM via Reduced Order Modeling and Domain Decomposition,” *FEM@LLNL Seminar*, Lawrence Livermore National Laboratory, (2024).

J. B. Freund & **S. W. Chung**, “Sensitivity and Optimization within simulations of chaotic flow system,” Lawrence Livermore National Laboratory, (2021).

**S. W. Chung**, “Sensitivity Calculation and Gradient-based Optimization for Chaotic Dynamical Systems,” *Fluid Mechanics Seminar*, University of Illinois at Urbana-Champaign, (2020).

**S. W. Chung**, “Sensitivity Analysis in Particle-in-cell methods,” Sandia National Laboratories, (2017).

## JOURNAL REFEREE

---

Journal of Fluid Mechanics (2022-present)  
Physics of Fluids (2025-present)

## RESEARCH TOOLS DEVELOPED

---

o **scaleupROM: Scalable Physics-guided Reduced Order Model**

<https://github.com/LLNL/scaleupROM>

- A data-driven discontinuous Galerkin FEM for general PDE systems based upon **MFEM** and **libROM**
- Developed and demonstrated the framework for various physics

o **pylibROM: python interface for libROM**

<https://github.com/LLNL/pylibROM>

- Implemented efficient python interface for **libROM** classes
- Demonstrated examples of DMD and projection-based ROM for various physics systems

o **libROM: Library for Reduced Order Models**

<https://www.librom.net/>

- Implemented and maintained Docker container and CI workflow

o **TPS: Torch Plasma Simulator**

with M. Bolinches, T. Oliver, K. Schulz, R. Moser

<https://github.com/pecos/tps>

- A discontinuous-Galerkin multi-physics application to support a plasma torch prediction, implemented upon a gpu-enabled finite-element library (**MFEM**)
- Formulated and implemented a two-temperature non-equilibrium reacting flow solver

o **magudi: Dual-consistent, Discrete-exact Adjoint solver for Compressible Flows**

with R. Vishnampet, J. B. Freund

<https://github.com/dreamer2368/magudi>

- A Fortran-based compressible flow solver, equipped with discrete-exact adjoint-based gradient.
  - Incorporated a Python-based framework for multi-point penalty-based optimization capability.
- **torch1d: one-dimensional reduced-model for inductively-coupled plasma torch**  
*with T. Oliver, R. Moser* <https://github.com/pecos/torch1d>
    - A Python-based finite-difference solver for a one-dimensional reduced torch model
    - Supports low-Mach limit formulation for two-temperature non-equilibrium plasma
  - **adjoint playground: Adjoint, penalty-based optimization for chaotic flow controls**  
*with J. B. Freund* [Available upon request](#)
    - A MATLAB-based penalty-based optimization framework for various chaotic dynamical systems.
    - Provides a discrete-exact adjoint gradient for semi-implicit Runge-Kutta 4th-order time integrator.
  - **PASS: Particle Adjoint Sensitivity Sandbox**  
*with J. B. Freund* <https://github.com/dreamer2368/PASS>
    - A Fortran-based 1D Particle-in-Cell code for plasma kinetics, with adjoint gradient capability

## AWARDS/FELLOWSHIPS

---

<b>Jeong-Song Fellowship</b> <i>Jeong-Song Cultural Foundation, Korea</i>	2014 - 2016 \$110,000
<b>Honor Graduation Award</b> <i>Seoul National University</i>	2014 Ranked 5 of 139 (summa cum laude)
<b>Presidential Science Fellowship</b> <i>M. B. Lee, the President of Republic of Korea</i>	2008 - 2014 \$40,000

## TEACHING

---

- **TAM 210/211: Statics**  
*Teaching Assistant* Spring 2020  
 University of Illinois at Urbana-Champaign
- Ranked as Excellent in the list of Spring 2020 semester.
- Conducted discussion sessions (1 time/wk) for 27 students.
- Prepared in-depth solution procedures.
- Provided extended office hours: 6 hrs/wk

## GRADUATE COURSES

---

Fluid Mechanics	Computational Methods	Applied Mechanics
Inviscid Flow	Computational Mechanics	Control System Theory & Design
Viscous Flow	Uncertainty Quantification	Solid Mechanics I
Instability and Transition	Asymptotic Method	Combustion Fundamentals
Turbulence	Mathematical Methods II	Non-Newtonian Fluid Mechanics & Rheology
