

SEUNG WHAN CHUNG

Computational Scientist ◇ Center for Applied Scientific Computing ◇ Lawrence Livermore National Laboratory

chung28@llnl.gov ◇ chung-research.com ◇ [linkedin](#)

EDUCATION

University of Illinois at Urbana-Champaign	<i>January 2017 - August 2021</i>
Ph. D in Theoretical and Applied Mechanics	GPA: 4.0/4.0
University of Illinois at Urbana-Champaign	<i>August 2014 - December 2016</i>
M. S in Theoretical and Applied Mechanics	GPA: 3.88/4.0
Seoul National University	<i>March 2008 - February 2014</i>
B. S. in Mechanical and Aerospace Engineering (Summa cum laude)	GPA: 3.96/4.3

EXPERIENCE

- **Lawrence Livermore National Laboratory** April 2024 - Present
Computational Scientist Livermore, CA
- **Lawrence Livermore National Laboratory** January 2023 - March 2024
Postdoctoral Staff Member Livermore, CA
- **University of Texas at Austin** September 2021 - December 2022
Postdoctoral Fellow (with Prof. R. Moser, Prof. L. Raja, Dr. T. Oliver) Austin, TX
- **University of Illinois at Urbana-Champaign** January 2015 - August 2021
Graduate Researcher (with Prof. Jonathan Freund) Urbana, IL
- **Sandia National Laboratories** January 2017 - May 2017
Student Intern (with Dr. Stephen D. Bond, Dr. Eric C. Cyr) Albuquerque, NM

S. W. Chung, R. Vishnampet, D. Bodony, & J. B. Freund, “Adjoint-based sensitivity of jet noise to near-nozzle forcing,” *Bulletin of the American Physical Society*, **62** (2017).

JOURNAL REFEREE

Journal of Fluid Mechanics (2022-present)

Physics of Fluids (2025-present)

International Journal of Digital Earth (2026-present)

APL Machine Learning (2026-present)

AWARDS/FELLOWSHIPS

Jeong-Song Fellowship	2014 - 2016
<i>Jeong-Song Cultural Foundation, Korea</i>	\$110,000

Honor Graduation Award	2014
<i>Seoul National University</i>	Ranked 5 of 139 (summa cum laude)

Presidential Science Fellowship	2008 - 2014
<i>M. B. Lee, the President of Republic of Korea</i>	\$40,000

SKILLS

Computer Languages	Python, C++, MATLAB, Fortran, pybind11
Parallel Programming	MPI
Simulation Libraries	MFEM, libROM, Gmsh
Scripting	Python, Bash, Flux
Version Control	Git, Docker
Documentation	L ^A T _E X, Vi/Vim, Mendeley
Visualization and I/O	PLOT3D, HDF5, Paraview
Presentation	Beamer, Keynote, Adobe Illustrator/Premiere

RESEARCH TOOLS DEVELOPED

- **scaleupROM: Scalable Physics-guided Reduced Order Model**
<https://github.com/LLNL/scaleupROM>
 - A data-driven discontinuous Galerkin FEM for general PDE systems based upon MFEM and libROM
 - Developed and demonstrated the framework for various physics
- **pylibROM: python interface for libROM**
<https://github.com/LLNL/pylibROM>
 - Implemented efficient python interface for libROM classes
 - Demonstrated examples of DMD and projection-based ROM for various physics systems
- **libROM: Library for Reduced Order Models**
<https://www.librom.net/>

- Implemented and maintained Docker container and CI workflow
- **TPS: Torch Plasma Simulator**
with M. Bolinches, T. Oliver, K. Schulz, R. Moser <https://github.com/pecos/tps>
 - A discontinuous-Galerkin multi-physics application to support a plasma torch prediction, implemented upon a gpu-enabled finite-element library ([MFEM](#))
 - Formulated and implemented a two-temperature non-equilibrium reacting flow solver
- **magudi: Dual-consistent, Discrete-exact Adjoint solver for Compressible Flows**
with R. Vishnampet, J. B. Freund <https://github.com/dreamer2368/magudi>
 - A Fortran-based compressible flow solver, equipped with discrete-exact adjoint-based gradient.
 - Incorporated a Python-based framework for multi-point penalty-based optimization capability.
- **torch1d: one-dimensional reduced-model for inductively-coupled plasma torch**
with T. Oliver, R. Moser <https://github.com/pecos/torch1d>
 - A Python-based finite-difference solver for a one-dimensional reduced torch model
 - Supports low-Mach limit formulation for two-temperature non-equilibrium plasma
- **adjoint playground: Adjoint, penalty-based optimization for chaotic flow controls**
with J. B. Freund *Available upon request*
 - A MATLAB-based penalty-based optimization framework for various chaotic dynamical systems.
 - Provides a discrete-exact adjoint gradient for semi-implicit Runge-Kutta 4th-order time integrator.
- **PASS: Particle Adjoint Sensitivity Sandbox**
with J. B. Freund <https://github.com/dreamer2368/PASS>
 - A Fortran-based 1D Particle-in-Cell code for plasma kinetics, with adjoint gradient capability

TEACHING

- **TAM 210/211: Statics** Spring 2020
Teaching Assistant University of Illinois at Urbana-Champaign
 - Ranked as Excellent in the list of Spring 2020 semester.
 - Conducted discussion sessions (1 time/wk) for 27 students.
 - Prepared in-depth solution procedures.
 - Provided extended office hours: 6 hrs/wk

GRADUATE COURSES

Fluid Mechanics	Computational Methods	Applied Mechanics
Inviscid Flow	Computational Mechanics	Control System Theory & Design
Viscous Flow	Uncertainty Quantification	Solid Mechanics I
Instability and Transition	Asymptotic Method	Combustion Fundamentals
Turbulence	Mathematical Methods II	Non-Newtonian Fluid Mechanics & Rheology
